

### Abstract

The present invention provides a filter for electronic display devices, comprising a squarylium compound represented by General Formula (I):

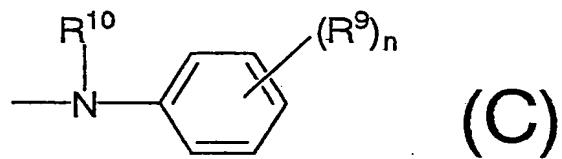

[wherein X represents a group represented by following Formula (A):

(wherein R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup>, and R<sup>4</sup> may be the same or different and each represents a hydrogen atom, a halogen atom and the like; and R<sup>5</sup> and R<sup>6</sup> may be the same or different and each represent a hydrogen atom, an alkyl group optionally having substituent(s) and the like) and the like; and Y represents

a group represented by following Formula (C):

(wherein  $R^9$  represents a halogen atom, an alkyl group optionally having substituent(s) and the like; and  $R^{10}$  represents a hydrogen atom, an alkyl group optionally having substituent(s) and the like) and the like, and "n" represents an integer of 0 to 5].
